

## **Golden Inu White Paper**

Welcome to our Golden Inu token community!

You're here because you're looking for something. The last year of most peoples' lives has been exhausting, destabilizing, and, more than anything, lonely. Quarantines kept everyone home away from loved ones, friends, and people who maybe aren't your friends yet! While it may be difficult to make new friends when you're stuck in your home, our goal is to prove it IS possible to make new friends!

By coming to here and, hopefully, becoming a part of our community, we are happy to tell you we're here to offer you not only a community FULL of love but also a community of opportunities. You might be asking how all of this is possible, and that is why we've put together this little introduction.

We would like to introduce you to our Golden Inu Community Token!

We are bringing this to you at a time when everyone wants to find love, spread love, and feel love, which is one of the reasons why we also say our token is a Love Community Token. We don't want you to just feel like this is a place where you come to click buttons and buy tokens because there is no love in that. Our love community is so, so much more than that, and to prove it, let's dive in and explain what all this is about!

### **Golden Inu Community Token**

If you're anything like us, you want more than anything to forget about 2020 and plan for the future. You may even want to find new friends and join communities again. After all, whole cities were brought to their knees, and communities stopped cold.

The Golden Inu Community token is our new token that spreads love throughout the entire community. We want everyone who becomes part of our community to feel love finally after a whole year of gray feelings.

Now for some technical information. After all, when you join a new community, you want to know that you're safe. Our community is built to ensure that you won't encounter hidden or surprise fees, your investment in your new community is safe, and you can continue to feel more and more happy by the day.

Also, we have a few terms here to talk about, and sometimes we'll discuss what they mean. After all, we want EVERYONE to feel love, not just trained professionals who understand all the token phrases. We want our New Golden Inus to understand what our community is about, too. When you see "New Golden," we're talking to all our new community members who are catching up.

Our token is based on BEP-20. For our New Golden Inus, BEP-20 is a token standard based on a Binance Smart Chain. Without getting too technical, this means that we can make it easier for our tokens to be exchanged, spent, bought, and other things both within our community and outside our community.

What this means for you is that we're using an established token standard that allows us to keep our fees LOW! Yes, we have to charge fees when you buy and sell our tokens, but this doesn't mean that we're the only ones benefiting from this. We did mention that this is a community of love, right?

For every transaction that takes place in our Golden Inu community, we will be tacking on a 10% tax. Wait! Stay with us! We promise we're not here to pocket 10% of everyone's money. After all, this is a LOVE token!

6% of the fees associated with each transaction get sent right back to holders. See? We told you it's a love community! 2% will go to the liquidity pool. Gather 'round, New Golden Inus! A liquidity pool is another term for blockchain tokens where some of the fees for transactions gets deposited and then is used to make sure that, when you buy and sell our tokens, you will automatically get your tokens. In other markets, there is sometimes difficulty with this, but not with our Golden Inu Love Tokens!

To be completely up-front with our new community, 2% of the transactions fees go to our Marketing fund. Let's discuss what that means for YOU, our love community. Marketing sometimes means wasted money on ads and such, but remember that this token is new and you, our newest members of the newest and greatest love community, were the first.

When we go out and make sure we spread the love to the world, more people seeking love will come to the community. The more people join our love community, the more our community will see how the love spreads. To be blunt, the more people who join our community, the higher the value of your Golden Inu tokens! So, while we're using some of the fees for marketing, this benefits you, our love community, as well!

Also, the marketing fund isn't just for ads. This community is about SPREADING the love, not keeping it for ourselves! We have big plans for the spreading the love, and to start, we want to put together huge giveaways on a regular basis. Stay tuned for more information on this because the opportunities are going to be huge, and they won't stay around for very long.

Coming back around to your security, some of these tokens out there are dangerous – they bring in new people and then, just as soon as the value pops up, they sell their stake and everyone is left holding the bag. Not with our community! We keep telling you we’re creating a love community, and we mean it! Liquidity is locked and we’ve renounced ownership. This means that all we can do as the developers is to support the community and help spread the love.

### **What’s Next For the Love Community?**

Now that you’re a part of our community, we’d like to spare just a bit about what we have planned next. First, just know that, when you join us, you’re joining a community of love that spans the entire globe! Our community includes members from most major countries and even places like Japan, Nigeria, and Vietnam! When you help us spread the love, you can feel even better knowing you’re helping us spread love to the entire world.

Now to our plans for the token. We have plans in Q3 of 2021 to start listing on major exchanges like Coingecko, CoinMarketCap, and other exchanges. Once we get there, this will send our love community into the stratosphere!

We’ll also start rolling out our marketing campaigns where we’ll get more specific about what we intend to do with that 2% we’re putting into the Dev Wallet for marketing. Stay tuned for more information on this.

By Q3 2021, we also plan to roll out our new exchange – the GIExchange. We told you we had big plans!

### **GIExchange – What is it?**

The Golden Inu Exchange – we’re calling it the GIExchange – is the most beautiful exchange in the world. Not only is it going to be the best-looking one out there, but our exchange will have far lower fees giveaways, stake options, and much more! This exchange is going to change the whole game, not just our community. Stay with us and we’ll be sharing more information on this very soon.

### **Welcome to our Golden Inu Love Community!**

We’re so glad you’re here, and we can wait to show you what we have in store. This world needs more love, and we plan to spread it further and faster than anyone ever has. Keep in touch with our social media as well – we’re always announcing new things!
